

Server Error in '/' Application.

Access is denied

Description: An unhandled exception occurred during the execution of the current web request. Please review the stack trace for more information about the error and where it originated in the code.

Exception Details: System.ComponentModel.Win32Exception: Access is denied

Source Error:

An unhandled exception was generated during the execution of the current web request. Information regarding the origin and location of the exception can be identified using the exception stack trace below.

Stack Trace:

```
[Win32Exception (0x80004005):  
Access is denied]  
  
[SqlException (0x80131904): A  
network-related or instance-  
specific error occurred while  
establishing a connection to SQL  
Server. The server was not found or  
was not accessible. Verify that the  
instance name is correct and that  
SQL Server is configured to allow  
remote connections. (provider:  
Named Pipes Provider, error: 40 -  
Could not open a connection to SQL  
Server)]
