**March 26<sup>th</sup>/2024 @ 1pm**

**A Complete Herd Dispersal from**

**Dave Hanson (Tested Here)**

These Ranch raised, Blk Cows were exposed to Blk Angus Bulls on July 20<sup>th</sup> for 50 days. The cattle are on a full herd health program, Express FP5 VL5, and treated with Ivomec on February 27<sup>th</sup>. The cattle program has been 25 years of solid Blk Angus Genetics. Last fall the steer calves averaged 503 Lbs. The Heifers were exposed to Low Birth Weight, Blk Angus Bulls on July 10<sup>th</sup> for 50 days. Most of the bull power has come from Chapman Angus, Outlaw Coulee(Corrie Richardson), South Shadow Angus( Delorme's), and Sandy Bar Angus( Switzer's) over the 25 years.
