40 Open Red Angus Heifers – Will and Kendra Waldner

They are on the Zoetis full herd health program, and were given full shots at branding and weaning, and have been checked for breeding soundness by Dr. Wade Hoffman on March 21, 2023.

All home raised, one iron heifers, that have not been topped. They have been wintered on corn silage, 3lbs of grain, and protein supplement. A very nice, uniform, quiet group of Red Angus breeding heifers.
