Notice: Re Bred Cow Sales

Cows and heifers are confirmed safe in calf to the buyer, at the time of sale. After sale, they become the buyers responsibility.

NOTE: Confirming pregnant animals is highly accurate. However, calving dates over 130 days (4.5 months) is not as accurate as those tested between 45 & 130 days (1.5 - 4.5 months). Pregnancy accuracy is an estimation and should be considered +/- 1 month of estimation.
