Black Gold, Greenwood & consignors have entered several of the females on offer in shows throughout the fall. They are willing to keep any of those sale females under their care and management throughout the fall, free of charge. If the calves are left there, any winnings would be split 50/50 between the buyer and seller, and it would be their decision if the heifers attend or not. All they ask is that the cattle left under Black Gold & Greenwood care are insured.
