44A	8L	March 6
44B	13L	March 6
44C	150L	March
44D	166L	Feb 28

Commercial females will sell in groups. They are all purebred Angus females selling without registration papers. They have no brands. All heifers were exposed May 10 - May 30 to Red PIE Complete 221, and after May 31 to Red Wheel First Blood 72K. They are calving ease bulls that will leave some performance in their calves. We have listed due dates for any observed breeding dates. According to the vets ultrasound we expect all these heifers to calve in the first two breeding cycles. All heifers were vaccinated twice as calves with Ultrabac 7 and BoviShield Gold One Shot. They were vaccinated pre-breeding with Bovi-Shield Gold VL, and were poured this fall with Ivomec.

Commercial heifers must be picked up from the sale site, or we will help arrange trucking.
